### WEB DEVELOPER

*I am a Full Stack Web Developer trained in LAMP, as well as JavaScript, jQuery, HTML, and CSS. After graduating from Taylor University, I spent seven years as a professional educator, where I developed strong record-keeping, customer service, and interpersonal skills. After completing CodeUp, a web development boot camp in San Antonio, Texas, I am ready to transition into my new career helping as a front and back end web developer. I love the process of building web software and pages and am eager to bring my passion to an organization that needs a highly motivated junior developer to mold.*

|--|--|
| ◆ Hard-working and reliable            | ◆ Experienced working with people from a variety of backgrounds        |
| ◆ Eager to learn and improve my skills | ◆ Possess knowledge of Bootstrap, Git, and other web development tools |
- 

### PROFESSIONAL EXPERIENCE

#### **Web Developer**

***From 2014 to present***

*I am a graduate of CodeUp, a programming boot camp in San Antonio, Texas, where I was taught the full LAMP stack, as well as JavaScript, jQuery, HTML, and CSS. Over a 12-week period, I completed over a hundred exercises, homework assignments, and coding challenges. I also helped to develop a <description of capstone project will go here as will my role in it>*

#### **Professional Educator**

***From 2007 to 2014***

*I taught all grades 2-9 at four different schools over a period of seven years. At two of my schools, the student body was over 95% African American, and at another school I taught exclusively special needs children. I tailored my instruction to fit the needs of my students, developed strong relations with students and their families, and kept detailed and organized records of student progress.*

### EDUCATION/CERTIFICATION

- Graduated from Taylor University with Bachelor of Science in Elementary Education in 2006.
- Completed 'CodeUp,' a 12-week, intensive web development boot camp
