WEB DEVELOPER

I love the process of building web software and pages and am eager to bring my passion to an organization that needs a highly motivated junior developer who can quickly learn new technologies. After completing CodeUp, a web development boot camp in San Antonio, Texas, I am ready to transition into my new career helping as a front and back end web developer. Prior to becoming a developer, I spent seven years as a professional educator, where I developed strong record-keeping, customer service, and interpersonal skills.

SKILLS

- ◆ PHP
- ◆ MySQL
- ◆ HTML5 and CSS3
- ◆ JavaScript (with a focus on jQuery)
- ◆ Laravel

PROFESSIONAL EXPERIENCE

Web Developer

From 2014 to Present

I am a graduate of CodeUp, a programming boot camp in San Antonio, Texas, where I was taught the full LNMP stack, as well as JavaScript, jQuery, HTML5, and CSS3. Over a 12-week period, I completed over a hundred exercises, homework assignments, and coding challenges, including:

- ◆ a whack-a-mole game made with JavaScript and jQuery - <https://github.com/pkuzma101/Whack-amole/tree/master/public>
- ◆ an interactive things-to-do list using PHP and MySQL - https://github.com/pkuzma101/blog.dev/tree/master/public/projects/todo_list
- ◆ online blog, portfolio, and resume at <http://paulkuzmadev.com>
- ◆ World Mentr, an interactive web site that allows entrepreneurs from all over the world to give or receive mentoring assistance - <http://worldmentr.org>

Professional Educator

From 2007 to 2014

I taught all grades 2-9 at four different schools over a period of seven years. I tailored my instruction to fit the needs of my students, which at one school were exclusively special needs children. I developed strong relations with students and their families, and kept detailed and organized records of student progress.

EDUCATION/CERTIFICATION

- ◆ *CodeUp* - a 12-week, intensive web development boot camp in 2014
- ◆ *Taylor University* - B.S. in Elementary Education in 2006
