Indianapolis, IN 46208   kuzma.paul@gmail.com

WEB DEVELOPER

After graduating from Taylor University, I spent seven years as a professional educator, where I developed strong record-keeping, customer service, and interpersonal skills. After completing CodeUp, a web development boot camp in San Antonio, Texas, I am ready to transition into my new career helping as a front and back end web developer. I love the process of building web software and pages and am eager to bring my passion to an organization that needs a highly motivated junior developer who can quickly learn new technologies.

SKILLS

- ❖ PHP
- ❖ MySQL
- ❖ HTML5 and CSS3
- ❖ JavaScript (with a focus on jQuery)
- ❖ Laravel

PROFESSIONAL EXPERIENCE

Web Developer   **From 2014 to present**

I am a graduate of CodeUp, a programming boot camp in San Antonio, Texas, where I was taught the full LNMP stack, as well as JavaScript, jQuery, HTML5, and CSS3. Over a 12-week period, I completed over a hundred exercises, homework assignments, and coding challenges, including:

- ❖ a whack-a-mole game made with JavaScript and jQuery – https://github.com/pkuzma101/blog.dev/tree/master/public/whackamole/public
- ❖ a table of national parks made using PHP and MySQL – https://github.com/pkuzma101/blog.dev/tree/master/public/national_parks
- ❖ an interactive things-to-do list using PHP and MySQL –

Professional Educator   **From 2007 to 2014**

I taught all grades 2-9 at four different schools over a period of seven years. I tailored my instruction to fit the needs of my students, which at one school, were 100% African American, and at another school were exclusively special needs children. I developed strong relations with students and their families, and kept detailed and organized records of student progress.

EDUCATION/CERTIFICATION

- • *Graduated from Taylor University with Bachelor of Science in Elementary Education in 2006.*
- • *Completed 'CodeUp,' a 12-week, intensive web development boot camp*
